

*Close the
language gap:*

Learn Construction Spanish!

4-day construction Spanish training • 1 night per week (Thursdays)

Beginning June 8, 2006 • 6:30-9:30 pm • No cost to participants

According to the U.S. Bureau of Labor Statistics, Hispanics represent nearly 30 percent of construction laborers. That national figure often jumps higher on the job. "Eighty percent of our construction force are Spanish speakers," says a local superintendent with a large southern construction company.

Such diversity presents obvious challenges for builders, who must somehow communicate technical directions, safety information, and more, without the benefit of a common language.

The obvious solution? Provide construction Spanish classes that expose builders to the basics – "¿Dónde está tu casco?" or, "Where is your hard hat?"

Developed specifically for Builders and Contractors who hire and supervise Hispanic employees. If you're a builder, contractor, or other construction professional, this class will introduce the language skills you need to communicate with employees whose only language is Spanish.

Location: Mississippi Gulf Coast Community College
Jefferson Davis Campus
Student Services Building, Room U140

Due to limited space, registration is required.
